

**transport and remediation of subsurface contaminants** - delineates the state of the science in colloidal interfacial and surfactant phenomena influencing natural migration and remediation of contaminants in the subsurface a panel discussion indicates critical research needs relative to extending our understanding and management of soil and ground water resources, **transport and remediation of subsurface contaminants** - transport and remediation of subsurface contaminants colloidal interfacial and surfactant phenomena developed from a symposium sponsored by the division of colloid and surface chemistry of the american chemical society at the 65th annual colloid and surface science symposium norman oklahoma june 17 19 1991, **transport and remediation of subsurface contaminants** - machine derived contents note transport and remediation of subsurface contaminants introduction colloid deposition in porous media and an evaluation of bed media cleaning techniques deposition of colloids in porous media theory and numerical solution surface charge repulsive effects on the mobility of inorganic colloids in subsurface systems, **transport and remediation of subsurface contaminants** - combines a timely review of the current understanding of subsurface contaminant transport and remediation with an insightful discussion of critical issues that demand future consideration presents in one volume the results of research from a variety of disciplines including chemistry chemical engineering materials science and environmental science, **transport and remediation of subsurface contaminants** - transport and remediation of subsurface contaminants colloidal interfacial and surfactant phenomena average rating 0 out of 5 stars based on 0 reviews write a review this button opens a dialog that displays additional images for this product with the option to zoom in or out, **surfactants for ground water remediation sciencedirect** - surfactants and colloid science in ground water remediation when the sand grain surfaces are strongly water wet with a contact angle of zero this configuration is the lowest free energy state of the droplet water solid medium system because of the interfacial tension between the napl and the water
